ASSOCIATION QUÉBÉCOISE POUR  
L'INNOUITÉ ALIMENTAIRE

## Introduction

The Association québécoise pour l'innocuité alimentaire (AQIA) [Quebec Association for Food Safety, AQIA] is the only French-speaking association dedicated entirely to food safety and quality. It is the leader in food quality and safety in Quebec, and brings together various members from the bio-food industry.

Each year, AQIA organizes a symposium on a relevant and timely theme for the food safety community. We offer several partnership categories to showcase your leadership in the sector and ensure your company's visibility among a targeted clientele: Quebec food quality and safety professionals at the industrial, academic and decision-making levels.

# About us

## Unique in the field of food safety in Quebec!

The mission of the Association québécoise pour l'innocuité alimentaire (AQIA), an affiliate of the International Association for Food Protection (IAFP), is to provide an exchange platform for food safety professionals to support the transfer of knowledge and information on the safety of the food supply.

### Mission

To provide a platform for food safety professionals (industry, services, training, politics and research) to share information and improve knowledge of food quality and safety.

### Our members

# Symposium of AQIA

Come and find concrete solutions to your challenges and cutting-edge approaches to food safety!

**Focus on the digital transition.**

AQIA is pleased to invite its members and colleagues from the bio-food industry to its 2024 annual scientific meeting. The symposium will take place on September 19 and 20, 2024, at the Saint-Hyacinthe Research and Development Centre, in the heart of an industrial park densely populated with biofood companies. The Saint-Hyacinthe RDC is part of Agriculture and Agri-Food Canada's (AAC) network of 20 research and development centers.

The center's research members will open the doors of their facilities to us for targeted laboratory tours.

Firmly focused on today's food safety issues, our symposium will provide you with plenty of opportunities to hone your expertise and network.
